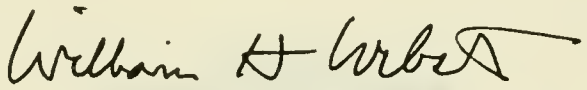
FOREWORD

The year 1982 was significant in the Uniform Crime Reporting (UCR) Program for several reasons, the most important being the reduction in the amount of reported crime. During this year, the number of reported Crime Index offenses dropped by 3 percent from 1981. You may recall that we reached an all-time high of reported crime in this country in 1980 and that level remained static in 1981. Those of us in law enforcement are now enjoying a period of cautious optimism. Two times during the 1970s, the Nation experienced reductions in reported crime; however, these downturns were short-lived. Based on past experience, the 1982 turnaround may be similar to those prior phenomena. We will know better during 1983 and 1984 whether we have rounded the corner in the fight against crime as measured by the Index.

The UCR Program, serving the Nation for over 50 years, has provided an indicator of the nature, extent, and seriousness of the crime problem. The Program, at its founding, was primarily designed to serve the needs of law enforcement executives by assisting them in their managerial roles. The secondary purpose of the Program was to provide the general public with a statistical statement of criminal activity in our society. During the intervening years, the suppliers of information as well as the consumers have changed dramatically, while the Program for the most part has remained constant in its structure. This structural stability has had great value in developing a historical perspective of crime in the United States.

In 1958, the UCR Program was reviewed and several changes made. But these changes, while important, did not impinge significantly on the statistical series. During the mid-1970s, the law enforcement community through its representative association, the International Association of Chiefs of Police, called for a review of the Program to determine its present-day utility and effectiveness for the Program's users. It was not until 1982 that appropriate steps could be taken to mount such an ambitious project. As a result of efforts by the Bureau of Justice Statistics and the FBI, an in-depth review of the Program is presently underway. This multiyear, multiphase project will compile the historical accomplishments of the UCR Program and develop a series of alternative futures. Once a course of action to enhance the UCR Program is approved, with law enforcement concurrence, the mechanism for data collection will be designed. This monumental undertaking will require the traditional cooperative spirit of the law enforcement community. It will require substantial research and analysis to identify the future needs in crime statistics for this country; but the vast improvements in law enforcement training, education, and technology along with the ever-increasing concern over the crime problem demand that this in-depth review take place.

As mentioned earlier, 1982 was marked with significant accomplishments: reduction in reported crime and the beginning of an in-depth review of UCR. Let us hope these events bode well for the law enforcement community and the people of this Nation.



William H. Webster
Director

CRIME FACTORS

The presence of crime in our Nation is a matter of serious concern not only to the law enforcement profession, but to society at large. Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. While no definitive conclusions have yet been reached, a number of factors affecting the volume and type of crime that occurs from place to place have been delineated. Some of these are as follows:

Population density and size of locality and its surrounding area.

Variations in composition of the population, particularly age structure.

Stability of population with respect to residents' mobility and transient factors.

Economic conditions, including job availability.

Cultural conditions, such as educational, recreational, and religious characteristics.

Climate.

Effective strength of law enforcement agencies.

Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Attitudes of citizenry toward crime.

Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. The reader is, therefore, cautioned against comparing statistical data of individual communities, counties, or colleges and universities solely on the basis of their population or student enrollment.

SECTION I
SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

The Uniform Crime Reporting (UCR) Program is a nationwide cooperative venture of over 15,000 city, county, and state law enforcement agencies. Voluntarily reporting data on crimes brought to their attention, these agencies make it possible to assess lawlessness in the Nation and to gauge fluctuations in its amount and type. The Program's primary objective– to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management– has remained the same throughout its more than 50-year history. Uses of the data produced have, however, expanded substantially. The American public, demonstrating its concern regarding the crime problem, has shown increasing interest in crime statistics. Further, UCR data have become a foremost research tool for criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice.

Historical Background

In the 1920s, the International Association of Chiefs of Police (IACP) recognized a need for national crime statistics and formed the Committee on Uniform Crime Records to develop a viable system of uniform police statistics. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 finalized a plan for crime reporting which became the foundation of the UCR Program.

Since offenses reported to law enforcement were the most readily available crime information, the Committee elected to survey local agencies to obtain data on crimes brought to their attention. Realizing that not all crimes are reported, the Committee evaluated various offenses on the basis of their seriousness, frequency of occurrence, and likelihood of being reported to law enforcement. Using those criteria, seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. These crimes, known jointly as the Crime Index, included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault; and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

Because the differences in criminal codes precluded a mere aggregation of state statistics to arrive at a national total, standardized offense definitions were formulated to provide nationwide uniformity. Without regard for local statutes, law enforcement agencies would submit data in accordance with UCR standard definitions of offenses as set forth in Appendix II of this publication. Variances in punishment for the same offenses in different state codes precluded any distinction between felony and misdemeanor crimes.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. In that same year, Congress enacted legislation under Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information. He, in turn, designated the FBI to serve as the national clearinghouse for data collected by the Program. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

The IACP's Committee on Uniform Crime Records, acting in an advisory capacity concerning the UCR Program's operation, remains a vital link between local police departments and the FBI. The National Sheriffs' Association (NSA) in June, 1966, established a Committee on Uniform Crime Reporting to serve in an advisory role to the NSA membership and the national UCR Program. This Committee actively encourages sheriffs throughout the country to fully participate in the Program.

Committees on Uniform Crime Reporting within state law enforcement associations are also active in promoting interest in the UCR Program. These committees foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the need arises.

Methods of Data Collection

The FBI receives the information its contributors compile either directly from the local law enforcement agency or through a state-level UCR Program. On an individual basis, agencies submitting directly to the FBI are provided continuing guidance and support from the national Program.

Mandatory state reporting requirements have made state-level UCR Programs very effective intermediaries between the FBI and its local contributors. Many of the 39 state Programs collect data beyond the national UCR requirements and address crime problems germane to their particular locales. These agencies can also provide more direct and frequent service to participating law enforcement agencies, make information more readily available for use at the state level, and contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law

enforcement agencies within the state. Instead, completed information from these agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, mandatory, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Law enforcement agencies across the country report monthly to the UCR Program. From records of all reports of crime received from victims, officers who discover infractions, or other sources, the agencies tabulate the number of Crime Index or Part I offenses brought to their attention. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, the stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the physical arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, race, and ethnic origin of arrestees are reported for both Part I and Part II offenses by crime category. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. Other law enforcement employee data, specifically the number of full-time sworn and civilian personnel, are reported as of October 31 of each calendar year.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions by the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. The communications containing these inquiries specifically direct attention to possible discrepancies in records or reporting procedures. When it is found that crime reporting procedures or annexations are in part responsible for the difference in the level of crime, the figures for specific crime categories, or if necessary totals, are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is established, and training

sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Also, since a good records system is essential for accurate crime reporting, the FBI furnishes the *Manual of Law Enforcement Records*, a guide in the establishment of a sound law enforcement records system.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized to explain revisions in the Program, as well as present information and instructional material. Newsletters are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographic makeup. Geographically, the United States is divisible by regions, divisions, and states. Further breakdowns rely on population figures and proximity to metropolitan areas.

A Standard Metropolitan Statistical Area (SMSA) is generally made up of a core city or cities with a population of 50,000 or more and the surrounding county or counties which share certain metropolitan characteristics. "Other cities," most of which are incorporated, are those outside SMSAs. For crime reporting purposes, rural counties are those outside the SMSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with less than 50,000 inhabitants together with counties which are within an SMSA. In this context, the core city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1982, law enforcement agencies active in the UCR Program represented approximately 224 million United States inhabitants, or 97 percent of the total population as established by the Bureau of the Census. The coverage amounted to 99 percent of the United States population living in SMSAs, 95 percent of the population in "other cities," and 90 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, each tabular presentation in this publication shows the extent of population coverage represented by the data included. More detailed information concerning the geographical entities used in this publication can be found in Appendix III.

Population Data

Bureau of the Census population estimates as of July 1, 1982, were used to compute crime rates for the Nation, states, geographic regions, and divisions. Using these estimates along with 1980 preliminary census counts, the UCR Program's staff extrapolated the populations of individual counties and cities. The estimated United States population increase in 1982 was approximately 1 percent over the 1981 estimate.

Offense Estimation

Tables 1 through 4 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts for such agencies are used in the above-mentioned presentations. Offense estimation occurs within each of three areas: Standard Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable time frames or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparisons between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

Recent Developments

On October 12, 1982, the Anti-Arson Act of 1982 was signed into law. Among its provisions were directives that the FBI permanently classify arson as a UCR Part I crime and that, in cooperation with the National Fire Data Center, the FBI develop and prepare a special statistical report on arson. As an initial step in the implementation of the special arson statistical program, the UCR staff held a planning conference during the week of November 30, 1982. Attendees included representatives from the fire service and law enforcement communities, as well as from the insurance industry. The recommendations made during the conference have been studied, and the final program methodology is being formulated.

Funded by the Bureau of Justice Statistics, a comprehensive evaluation of the overall UCR Program commenced in 1982. Throughout its more than 50 years of operation, the UCR Program has remained virtually unchanged in terms of the data collected and disseminated. In recent years, however, the capabilities of law enforcement to supply crime information have expanded significantly, and UCR data are being used for more diversified purposes. The study, which is being conducted by an independent research firm, will consist of three phases designed to explore areas for expansion and improvement in the Program. During the first phase, now underway, the historical evolution of the Program is being examined. Alternatives for the future direction of UCR will be developed in the second phase, and during the third, computer software and equipment requirements for the implementation of the phase two proposals will be determined. Input from local and state UCR participants, criminal justice entities, and other users of UCR data will be solicited to ensure any modifications to the Program will benefit its constituency.

The "Law Enforcement Personnel" portion of this edition has been modified to include only brief information on officers killed and assaulted. Extensive data on these topics are to be in a new consolidated document entitled *Law Enforcement Officers Killed and Assaulted*, which will also contain statistics formerly presented in the *Law Enforcement Officers Killed* and *Assaults on Federal Officers* publications.

The sixth National UCR Conference was held from June 27-30, 1983, at the FBI Academy, Quantico, Virginia. Staff members from operational state Programs, as well as representatives from states currently in Program developmental stages, were in attendance. Also present were members of the Committee on Uniform Crime Records of the IACP, the Uniform Crime Reporting Committee of the NSA, and the Steering Committee for the UCR evaluation project; staff from the Bureau of Justice Statistics, Bureau of Social Science Research, and Police Executive Research Forum; members of the fire service community and insurance industry; and the staff of Abt Associates, Inc., the private research firm conducting the UCR evaluation. Major topics of discussion were the UCR evaluation project and the development of the special arson program.

- one MURDER every 25 minutes
- one FORCIBLE RAPE every 7 minutes
- one ROBBERY every 59 seconds
- one AGGRAVATED ASSAULT every 49 seconds

one
PROPERTY CRIME
every 3 seconds

- one BURGLARY every 9 seconds
- one LARCENY-THEFT every 4 seconds
- one MOTOR VEHICLE THEFT every 30 seconds

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II
CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

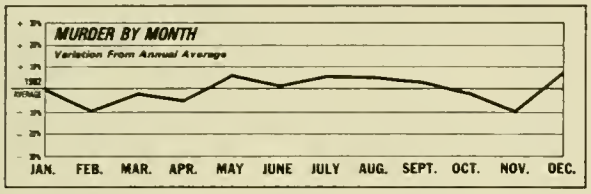
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*22,516*	*9.8*
1982	*21,012*	*9.1*
Percent change	– 6.7	– 7.1

Volume

An estimated 21,012 persons were murdered in the United States during 1982. More murder offenses occurred in December than in any other month of the year.

Geographically, the most populous region, the Southern States, accounted for 45 percent of the murders. The Western States reported 19 percent; the North Central States recorded 18 percent; and the Northeastern States, 17 percent.



Trend

Nationwide, 7 percent fewer murders were reported in 1982 than in 1981. With the exception of a 1-percent increase in cities under 25,000 in population, decreases in murder were evident in all population groups, 1982 versus 1981. The Nation's largest cities, those with populations over 250,000, experienced an 8-percent decline; the suburban areas, a 4-percent decrease; and the rural counties, a drop of 10 percent.

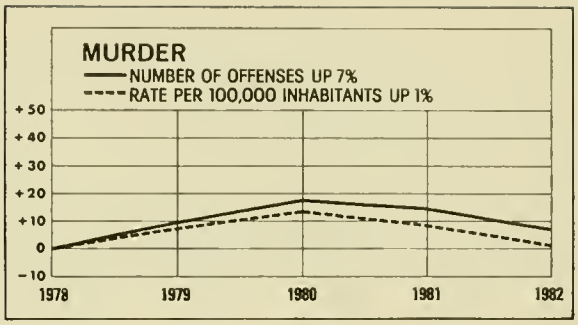
All regions registered declines in the number of murders during 1982. The decreases were 11 percent in the North Central States, 10 percent in the Western States, 7 percent in the Northeastern States, and 3 percent in the Southern States.

The accompanying chart reveals an increase of 7 percent nationally in the murder counts from 1978 to 1982.

Murder by Month, 1978 — 1982

[Percent of annual total]

Months	1978	1979	1980	1981	1982
January	7.4	8.2	7.8	8.8	8.3
February	7.5	7.5	7.3	7.8	7.5
March	8.3	8.1	7.2	8.4	8.1
April	7.8	7.5	7.4	7.9	7.9
May	8.0	8.1	8.0	8.4	8.8
June	8.1	7.7	8.5	8.4	8.4
July	8.6	8.8	9.5	8.8	8.8
August	8.5	8.6	10.3	8.7	8.8
September	8.9	8.5	8.7	8.3	8.6
October	8.3	8.9	8.3	8.0	8.2
November	8.5	8.8	8.1	7.9	7.5
December	10.0	9.2	8.8	8.6	9.0



Rate

Down 7 percent from the previous year, the 1982 national murder rate was 9 per 100,000 inhabitants. When the number of murder victims was related to the populations on a regional basis, the Southern States averaged 12 murders per 100,000 people, down 5 percent from 1981. In the Western States, for which a murder rate of 9 per 100,000 inhabitants was recorded, the rate dropped 12 percent. Each with murder rates of 7 per 100,000 in population, the Northeastern States' rate was down 8 percent and the North Central States' rate declined 11 percent.

Collectively, the SMSAs reported a murder rate of 10 victims per 100,000 inhabitants; the rural counties recorded a rate of 7 per 100,000 inhabitants; and cities outside metropolitan areas registered a murder rate of 6 per 100,000 inhabitants.

Nature

Contributing agencies provided supplemental information for 19,485 of the estimated 21,012 murders in 1982. Submitted monthly, the data consist of the age, sex, race, and ethnic origin of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

According to these statistics, approximately 76 percent of the murder victims in 1982 were males. An average of 55 of every 100 victims were white, 42 were black, and 2 were persons of other races.

Data based on murder incidents involving one victim and one offender show that murder incidents are most likely to be intraracial. For example, 89 percent of the white murder victims were killed by white offenders. Likewise, males are most often slain by males (82 percent in single victim/single offender situations). These same data show, however, that 9 of every 10 female victims are murdered by males.

As in previous years, firearms were the dominant weapons used in the commission of murders throughout the United States during 1982. Of those murders for which weapons were reported, 43 percent were by handguns, 7 percent by shotguns, 5 percent by rifles, and 4 percent involved other and unknown types of firearms.

Age, Sex, Race, and Ethnic Origin of Murder Victims, 1982

Cutting or stabbing instruments were employed in 21 percent, and other dangerous weapons such as blunt instruments, poison, explosives, etc., were used in 12 percent. Personal weapons (hands, fists, feet, etc.) accounted for the remaining 7 percent.

Within this section are presentations illustrating the number of murder offenses for which the types of weapons used were reported to the UCR Program. Also shown is a tabular analysis of murder weapons for the years 1978 through 1982.

It has long been recognized that murder is primarily a societal problem over which law enforcement has little or no control. Supporting this philosophy is the fact that 55 percent of the murders committed in 1982 were perpetrated by relatives or persons acquainted with the victims. Seventeen percent of all killings involved family relationships, one-half of which involved spouse killing spouse.

Arguments resulted in 41 percent of all murders, while 18 percent occurred as a result of felonious activities such as robbery, arson, etc. Another 5 percent were suspected to be the result of some felonious activity. The accompanying table shows murder circumstances/motives for the past 5 years.

Murder Circumstances/Motives, 1978-1982

[1]Because of rounding, percentages may not add to totals.
[2]Murders committed during arguments while under influence of narcotics are not counted in felony murders.

Clearances

Higher than for any other Crime Index offense, the nationwide murder clearance rate was 74 percent in 1982. City law enforcement agencies cleared 73 percent of the murders during the year, while those in suburban areas and rural counties cleared 72 and 80 percent, respectively. In 1982, persons under 18 years of age accounted for 4 percent of the willful killings cleared by law enforcement in cities and rural counties, and 5 percent of those cleared in suburban areas.

Persons Arrested

From 1981 to 1982, murder arrests decreased 7 percent in volume. Arrests of persons under age 18 dropped 19 percent, while those of persons aged 18 and over fell 6 percent.

Of all persons arrested for murder in 1982, 43 percent were under 25 years of age, with 9 percent of the total being 17 or younger. The 18- to 24-year age group showed the greatest involvement in this offense, accounting for 34 percent of the total 1982 murder arrests.

Blacks comprised 50 percent of the total arrestees for murder in 1982. Whites made up 49 percent, and the remainder were of other races. Twenty-three percent of the juvenile arrestees, 16 percent of the adult arrestees, and 17 percent of the total arrestees were of Hispanic ethnicity.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

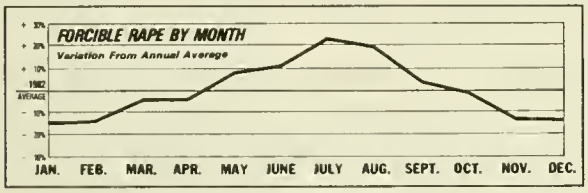
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*81,536*	*35.6*
1982	*77,763*	*33.6*
Percent change	– 4.6	– 5.6

Volume

Numbering an estimated 77,763, forcible rapes reported to law enforcement agencies accounted for 6 percent of the volume of violent crimes and 1 percent of the total Crime Index. Geographically, the South, the region with the largest population, recorded 37 percent of the 1982 forcible rape volume. The Western States accounted for 27 percent, the North Central States, 20 percent, and the Northeastern States, 16 percent.

As in previous years, more forcible rapes occurred in the summer months than during any other time of the year. July recorded the highest volume, while the lowest was registered in January.



Trend

The volume of forcible rapes reported to law enforcement agencies nationwide fell 5 percent in 1982 from the 1981 level. Similar to the national experience, all regions and population groupings reported declines in forcible rapes for the 2-year period.

Collectively, city law enforcement agencies and those in suburban areas recorded 5-percent declines, while rural county agencies registered a drop of 4 percent. Trends for the geographic regions showed the North Central States with the largest forcible rape decline, 7 percent. Both the Northeastern and Western Regions registered 6-percent decreases, while in the Southern States, the decline was 1 percent.

Comparisons for 5- and 10-year periods show the 1982 national forcible rape figures up 16 percent above the 1978 level and 51 percent above the 1973 volume.

Forcible Rape by Month, 1978-1982

[Percent of annual total]

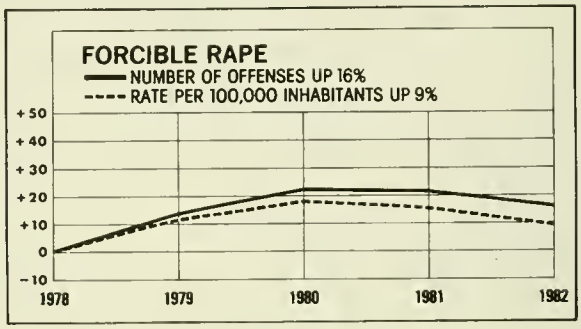
Months	1978	1979	1980	1981	1982
January	6.5	6.5	7.4	7.2	7.1
February	6.4	6.1	6.6	7.2	7.2
March	7.4	7.7	7.4	7.9	8.0
April	7.8	7.5	7.7	8.0	8.0
May	8.7	8.3	8.7	8.6	9.0
June	8.9	9.0	9.3	9.5	9.3
July	9.9	9.6	10.5	10.1	10.2
August	10.6	9.8	10.5	9.7	10.0
September	9.5	9.8	9.4	8.7	8.6
October	8.8	9.4	8.1	8.3	8.3
November	7.9	8.6	7.5	7.6	7.2
December	7.7	7.8	6.8	7.2	7.2

Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female, and in 1982, an estimated 65 of every 100,000 females in the country were reported rape victims. The rate was 6 percent lower than in 1981, but 9 percent higher than in 1978.

The 1982 female forcible rape rate was 76 victims per 100,000 females in the SMSAs, 39 per 100,000 females in cities outside metropolitan areas, and 29 per 100,000 females in rural counties.

On a regional basis, 89 per 100,000 females in the West were forcible rape victims. In the Southern States, the female forcible rape rate was 72; in the North Central States, 52; and in the Northeastern States, 50.



Nature

During 1982, 76 percent of all offenses reported in this category were rapes by force. Attempts or assaults to commit forcible rape comprised the remainder. Forcible rape, a violent crime against the person, is still recognized as one of the most underreported of all Index crimes. Victims' fear of their assailants and their embarrassment over the incidents are just two factors which can affect their decisions to contact law enforcement.

Clearances

Fifty-one percent of the known forcible rapes in the Nation were cleared by arrest or exceptional means in 1982. Law enforcement agencies in the rural counties recorded a 63-percent clearance rate; those in the suburban areas, a 51-percent clearance rate; and city agencies, a 49-percent rate. Of the total clearances for forcible rape in the Nation as a whole, 10 percent involved only persons under the age of 18. The suburban areas also recorded 10 percent involving that age group, while the cities reported 11 percent and the rural counties, 8 percent.

Persons Arrested

The number of forcible rape arrests in 1982 dropped 2 percent from 1981 but was 16 percent higher than the 1978 level. Arrests of persons under 18 years of age for this offense increased 8 percent for the 5-year period, 1978-1982; adult arrests climbed 17 percent for the same time frame.

Fifty-two percent of the forcible rape arrests in 1982 were of males under the age of 25, with 27 percent of the arrestees in the 18- to 22-year age group. Fifty percent of those arrested were black, 49 percent were white, and all other races comprised the remainder. Eleven percent of the forcible rape arrestees in 1982 were Hispanic.

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

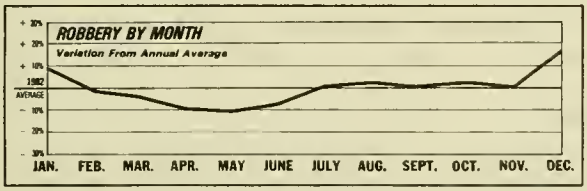
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*574,134*	*250.6*
1982	*536,888*	*231.9*
Percent change	−6.5	−7.5

Volume

Robberies totaled an estimated 536,888 offenses in 1982 and comprised 4 percent of all Index crimes and 42 percent of the violent crimes. The highest robbery counts were recorded in December and January, while the lowest occurred in April and May.

Regionally, the Northeastern States experienced the highest proportion of robberies, 32 percent of the total. The Southern States reported 28 percent; the Western States, 22 percent; and the North Central States, 18 percent.



Trend

The number of robberies decreased 6 percent in 1982 from the 1981 total. A decline of 12 percent was recorded by the Nation's rural counties, while the suburban areas and cities registered decreases of 9 and 6 percent, respectively.

All four regions experienced downturns in robbery from 1981 to 1982. In the Northeastern States, the decrease was 11 percent; in the North Central States, 8 percent; and in the Southern and Western States, 3 percent each.

The accompanying chart depicts the trend in the volume of robbery, as well as the robbery rate, for the years 1978-1982. In 1982, robbery offenses numbered 29 percent higher than in 1978 and 40 percent above the 1973 total.

Robbery by Month, 1978-1982

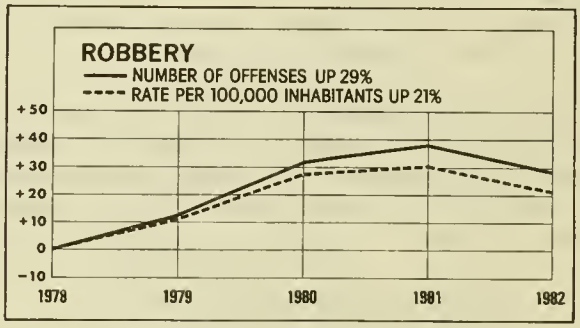
[Percent of annual total]

Months	1978	1979	1980	1981	1982
January	8.4	8.8	8.0	9.0	9.1
February	7.3	7.9	7.2	8.1	8.2
March	7.8	8.3	7.3	8.0	8.0
April	7.2	7.3	7.0	7.3	7.5
May	7.3	7.2	7.6	7.5	7.5
June	7.4	7.3	7.9	7.7	7.7
July	8.1	8.0	8.7	8.3	8.4
August	8.7	8.6	9.5	8.7	8.5
September	8.6	8.4	8.8	8.2	8.3
October	9.1	9.4	8.9	8.8	8.5
November	9.3	9.2	9.0	8.6	8.4
December	10.9	9.7	10.1	9.6	9.8

Rate

The 1982 robbery rate for the Nation was 232 per 100,000 inhabitants, down 7 percent from the 1981 rate. With 773 robberies per 100,000 people, the highest rate was experienced in cities with populations over 250,000. SMSAs recorded a rate of 299 robberies per 100,000 inhabitants, and in cities outside metropolitan areas, the rate was 56. The lowest incidence was in the rural areas where the rate was 19 per 100,000 people.

Robbery occurred most frequently in the Northeastern States where the rate was 348 per 100,000 inhabitants. The rate per 100,000 inhabitants for the Western States was 267; for the Southern States, 191; and for the North Central States, 162.



Nature

The value of property stolen due to robberies in 1982 was an estimated $339 million, with an average loss per incident of $632. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

Robberies on streets or highways accounted for more than half of the offenses in this category. The average dollar loss for this type of robbery was $414. Although accounting for only 1 percent of all robberies, those of banks registered the highest average loss, $3,347 per incident.

Robbery, Percent Distribution, 1982

Western States	100.0	41.2	12.7	7.6	38.5
Total	100.0	39.9	13.6	9.1	37.4

[1]Because of rounding, percentages may not add to totals.

Robberies of gas and service stations fell 17 percent in volume from 1978 to 1982. During this same period, bank robberies were up 19 percent; convenience store holdups rose 9 percent; and those of other commercial or business establishments increased 10 percent. Street robberies jumped 49 percent and residential robberies were up 27 percent for the 5-year period.

Clearances

Twenty-five percent of the robbery offenses reported to law enforcement were cleared during 1982. Rural law enforcement agencies registered the highest rate, clearing 43 percent of the robbery offenses reported to them. Agencies in suburban areas cleared 28 percent and those in cities, 25 percent. Persons under the age of 18 were the offenders in 12 percent of all 1982 robbery clearances. This age group accounted for 15 percent of the suburban area clearances, 12 percent of those in the cities, and 8 percent of the rural county clearances.

Persons Arrested

Law enforcement agencies made 2 percent fewer robbery arrests in 1982 than in 1981. The number of persons arrested was down 11 percent in the rural counties, 4 percent in the suburban areas, and 1 percent in the cities.

During 1982, 69 percent of the persons arrested for robbery were under 25 years of age, 49 percent were under 21, and 26 percent were under 18. Ninety-three percent of the arrestees were male.

From the standpoint of race, 61 percent of those arrested were black, 38 percent were white, and the remainder were of other races. Thirteen percent of the robbery arrestees were Hispanic.

When compared with the 1978 total, robbery arrests showed a 19-percent increase in 1982. Although adult arrests were up 28 percent during this period, those of persons under 18 decreased 4 percent.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

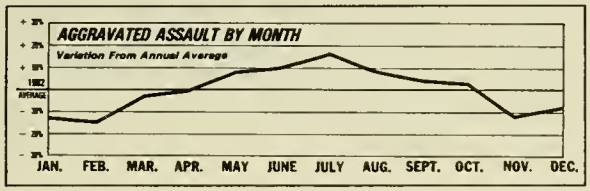
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*643,720*	*280.9*
1982	*650,042*	*280.8*
Percent change	+1.0	- - -

Volume

An estimated 650,042 aggravated assaults, comprising 5 percent of the total Crime Index and 51 percent of the crimes of violence, occurred in the Nation during 1982. The most populous region, the Southern States, reported 39 percent of all aggravated assaults. The Western States followed with 23 percent; the Northeastern States recorded 20 percent; and the North Central States registered 19 percent.

As in previous years, the summer months of 1982 experienced the highest volume of this offense.



Trend

In 1982, aggravated assault increased 1 percent in volume as compared to 1981 and was the only Index offense to record an increase. For the 2-year period, the trend in the geographic regions ranged from a decrease of 4 percent in the Western States to a 5-percent increase in the Southern States. While a less than 1-percent decrease was recorded in the Northeastern States, an increase of 1 percent was reported in the North Central States.

City and rural county law enforcement agencies recorded virtually no change in their aggravated assault counts from 1981 to 1982. Those in suburban counties experienced a 1-percent increase.

The 5-year trend, 1982 over 1978, showed an increase of 16 percent in the aggravated assault volume.

Aggravated Assault by Month, 1978-1982

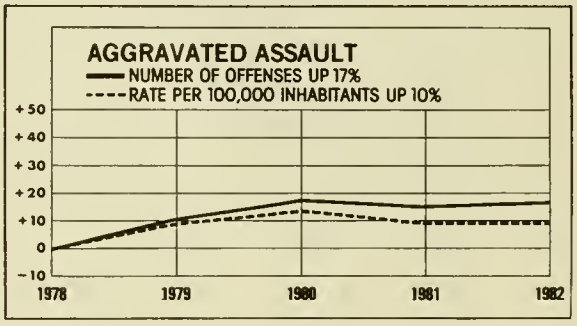
[Percent of annual total]

Months	1978	1979	1980	1981	1982
January	7.1	7.0	6.9	7.4	7.3
February	6.4	6.7	6.6	7.1	7.1
March	7.5	8.1	7.6	8.0	8.1
April	7.9	7.9	7.7	8.2	8.3
May	8.8	8.5	8.9	8.7	9.0
June	8.8	8.9	9.6	9.1	9.2
July	9.5	9.4	10.3	9.4	9.7
August	9.5	9.1	10.4	9.4	9.0
September	9.0	9.2	8.9	8.6	8.7
October	8.8	9.2	8.0	8.5	8.5
November	8.0	8.1	7.7	7.7	7.4
December	8.5	7.9	7.4	7.9	7.7

Rate

An average of 281 victims of aggravated assault were reported per 100,000 United States inhabitants during 1982. In SMSAs, the aggravated assault rate was 315 per 100,000 inhabitants; in cities outside metropolitan areas, it was 250; and in rural areas, it was 131 per 100,000 inhabitants.

Nationwide, the rate for aggravated assault showed no change from 1981 and a 10-percent increase over 1978.



Nature

In 1982, 22 percent of the aggravated assaults were committed with firearms; 23 percent with knives or other cutting instruments; 28 percent with blunt objects or other dangerous weapons; and the remainder were committed with personal weapons such as hands, fists, and feet.

A comparison of 1978 and 1982 revealed that aggravated assaults committed with knives or other cutting instruments increased 20 percent during the 5-year period. The use of firearms and personal weapons each rose 16 percent, while aggravated assaults where blunt objects or other dangerous weapons were used were up 15 percent.

The accompanying table shows the 1982 regional experience of aggravated assault by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1982

[Percent distribution]

Region	Total all weapons[1]	Fire-arms	Knife or other cutting instru-ments	Other weapons; club, poison, etc.	Personal weapons
Northeastern States	100.0	14.9	24.1	28.7	32.3
North Central States	100.0	23.1	23.2	28.3	25.3
Southern States	100.0	26.1	24.9	26.5	22.4
Western States	100.0	22.0	19.6	29.3	29.0
Total	100.0	22.4	23.2	27.9	26.5

[1]Because of rounding, percentages may not add to totals.

Clearances

Law enforcement agencies throughout the Nation cleared an average of 60 per 100 reported cases of aggravated assault during 1982. The rural counties recorded the highest clearance rate, 69 percent.

Nine percent of the national and city clearances were of offenses in which only persons under age 18 were identified as the assailants. Persons under 18 years of age accounted for 10 percent of the suburban county clearances, and 5 percent of those in the rural counties.

Persons Arrested

The estimated number of persons arrested for aggravated assault in 1982 was 313,150, up 2 percent over the 1981 total. Persons arrested for this offense comprised 58 percent of all arrestees for violent crimes.

During the 5-year period, 1978-1982, total arrests for aggravated assaults increased 18 percent. Arrests of persons 18 years of age and over rose 22 percent, while the number of arrests of persons under age 18 decreased 5 percent.

In 1982, arrests of males for this offense outnumbered those of females by 7 to 1. Whites comprised 60 percent of the arrestees for aggravated assault; blacks, 39 percent; and all other races, the remainder. Eighty-seven percent of the arrestees were non-Hispanic.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

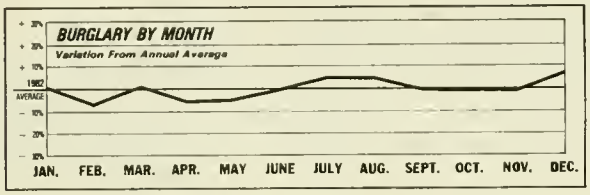
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*3,739,821*	*1,632.1*
1982	*3,415,540*	*1,475.2*
Percent change	– 8.7	– 9.6

Volume

Estimated at over 3.4 million offenses in 1982, burglaries accounted for 27 percent of the Crime Index total and 30 percent of all property crime. The Southern States, the most populous region, recorded 34 percent of all reported burglaries. The Western States accounted for 24 percent, the North Central States for 22 percent, and the Northeastern States for 20 percent.

Burglary occurred most frequently in December of 1982, while the lowest incidence was reported in February.



Trend

Nationwide trends showed the burglary volume decreasing 9 percent in 1982 from the 1981 total. Like the national experience, city burglary counts declined 9 percent. The suburban areas recorded a drop of 11 percent, and the rural counties, a decline of 8 percent. Five-year trends showed the 1982 total volume 10 percent higher than in 1978.

Geographically, all regions recorded significant declines in 1982 as compared to the 1981 level. Burglary decreased 15 percent in the Northeastern Region, 8 percent in both the North Central and Western Regions, and 5 percent in the Southern Region.

Rate

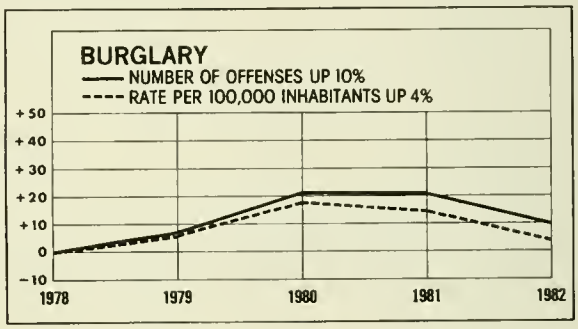
The 1982 burglary rate (1,475 per 100,000 inhabitants) was 10 percent below the 1981 rate but up 4 percent over the 1978 experience. In the SMSAs, a rate of 1,669 for every 100,000 in population was reported. The cities outside metropolitan areas had a rate of 1,144 per 100,000, and the rural counties showed a rate of 726 per 100,000 inhabitants.

Burglary by Month, 1978-1982

[Percent of annual total]

Months	1978	1979	1980	1981	1982
January	8.0	8.2	8.0	8.8	8.4
February	7.2	7.3	7.2	8.2	7.7
March	8.0	8.2	7.9	8.6	8.4
April	7.6	7.8	7.6	7.9	7.9
May	8.1	8.0	8.1	7.9	7.9
June	7.9	7.8	8.1	8.0	8.3
July	8.8	8.8	9.0	8.6	8.8
August	9.1	8.9	9.2	8.7	8.8
September	8.5	8.4	8.6	8.2	8.3
October	8.9	8.9	8.6	8.3	8.3
November	8.7	8.6	8.4	8.1	8.3
December	9.1	9.0	9.3	8.5	8.9

Down in all geographic regions, the burglary rate was 1,841 in the Western States, 1,504 in the Southern States, 1,366 in the Northeastern States, and 1,249 in the North Central States. The rate decreases ranged from 7 percent in the South to 16 percent in the Northeast.



Nature

Accounting for 66 percent of the reported burglaries during 1982, residential burglaries decreased 12 percent, 1982 versus 1981. Nonresidential offenses accounted for the remaining 34 percent and were down 4 percent for the same 2-year period.

Both day and nighttime occurrences of burglary decreased. Daytime residential burglaries dropped 16 percent in volume, while those committed during the night declined 8 percent. Daytime nonresidential burglaries fell 3 percent, and nighttime incidences fell 4 percent.

Seventy-three percent of the burglaries in 1982 involved forcible entry, 19 percent were unlawful entries (without force), and the remainder were forcible entry attempts.

Burglary victims suffered losses estimated at $3 billion in 1982, and the average dollar loss per burglary was $880. The average loss for residential offenses was $927, while for nonresidential property it was $788.

Clearances

The 1982 national burglary clearance rate was 15 percent. Adults were involved in 76 percent of all burglary offenses

cleared, and only young people under 18 years of age were offenders in the remaining 24 percent.

In the suburban areas, persons under age 18 accounted for 27 percent of the burglary clearances; in the rural counties, they comprised 24 percent; and in cities with more than 250,000 inhabitants, they were offenders in 18 percent.

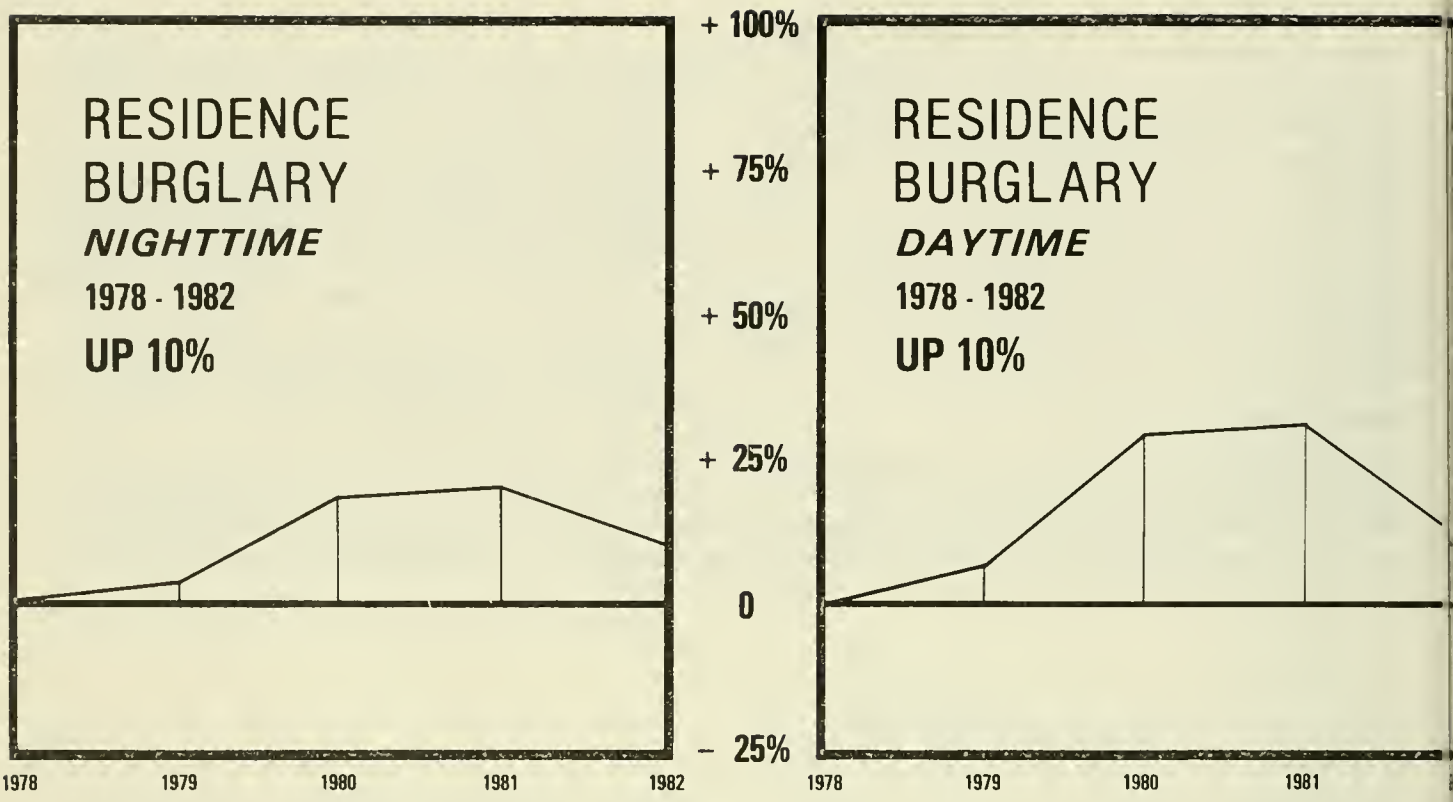
Law enforcement agencies in rural counties cleared 17 percent of the burglaries brought to their attention. Those in the suburban areas recorded a clearance rate of 16 percent, and agencies in cities with 250,000 or more inhabitants obtained clearances in 12 percent of these crimes.

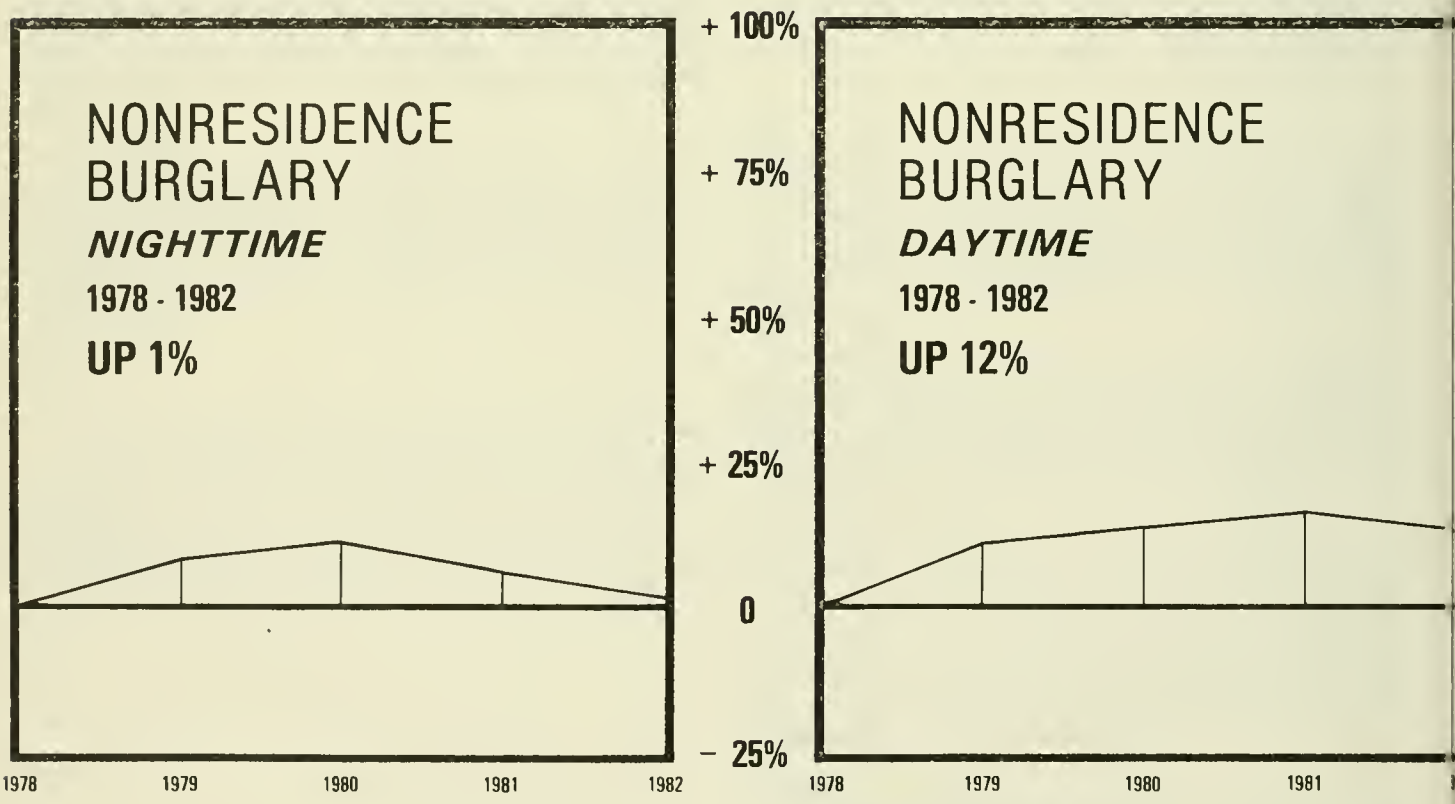
Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary. A comparison of arrest figures for 1978 and 1982 shows a 3-percent increase in total burglary arrests but a 22-percent drop in arrests of persons under 18 years of age. Arrests of adults for burglary jumped 30 percent during the 5-year period.

From 1981 to 1982, burglary arrests decreased 4 percent. Arrests of persons 18 years of age and over showed virtually no change for the 2-year period, while those of persons under age 18 were down 10 percent in number. Burglary arrests dropped 6 percent in the suburban areas, 5 percent in the rural counties, and 3 percent in the Nation's cities.

During 1982, 77 percent of the burglary arrestees were under the age of 25, and 40 percent were younger than 18. An average of 6 of each 100 persons arrested for this crime during 1982 were female. Of the total burglary arrestees, whites accounted for 67 percent, blacks for 32 percent, and other races for the remainder. Eighty-seven percent of the persons arrested for burglary were non-Hispanic.





BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

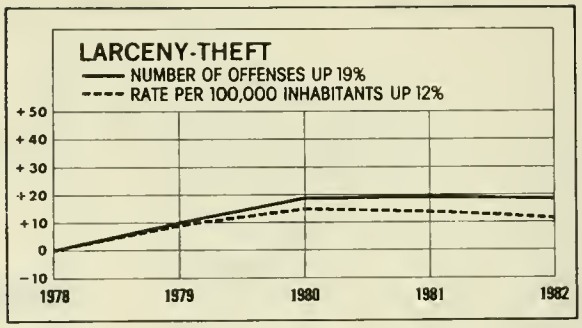
TREND

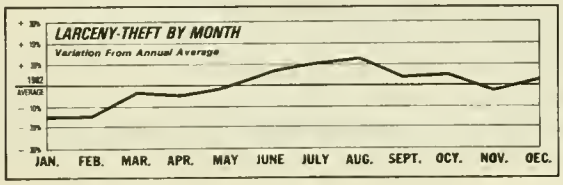
Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*7,154,541*	*3,122.3*
1982	*7,107,663*	*3,069.8*
Percent change	−.7	−1.7

Volume

Comprising 55 percent of the Crime Index total and 61 percent of all property crimes in 1982, larceny-thefts numbered over 7.1 million offenses. This high-volume crime occurred most frequently in August and least often during January and February.

The highest number of larceny-thefts was reported by the Southern States, the most populous region, with 33 percent of the total. The North Central and the Western States each recorded 24 percent, and the Northeastern States accounted for 19 percent.





Trend

Nationally, the 1982 larceny-theft volume dropped 1 percent from the 1981 experience. Collectively, the cities, like the Nation as a whole, recorded a 1-percent decrease for 1982 as compared to 1981. For the suburban areas, a 3-percent decline was registered, and in the rural counties, a decrease of 4 percent occurred.

Regionally, larceny declined 5 percent in the North Central States and 2 percent in the Northeastern States. The South, however, recorded a 2-percent increase in its larceny-theft total, while in the West there was virtually no change from the previous year.

Rate

Down 2 percent from 1981, the 1982 national larceny-theft rate was 3,070 per 100,000 United States inhabitants. The rate was 12 percent higher than in 1978.

November	8.4	8.3	7.9	8.1	8.2
December	8.5	8.4	8.3	8.2	8.5

The larceny-theft rate per 100,000 inhabitants was 3,436 in SMSAs, 3,297 in cities outside metropolitan areas, and 1,056 in the rural counties. Rates for the geographic regions ranged from a high of 3,865 per 100,000 population in the Western States to a low of 2,664 per 100,000 inhabitants in the Northeastern States. Only the Southern Region showed an increase in the larceny-theft rate, 1 percent.

Nature

The average value of property stolen during larceny-thefts in 1982 was $340 per incident, the same as in 1981. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $2.4 billion for the year. This estimated dollar loss is considered conservative since other studies have indicated that many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention.

The average value of goods and property reported stolen as a result of pocket-picking in 1982 was $237; by purse-snatching, $176; and by shoplifting, $71. Miscellaneous thefts from buildings and thefts from motor vehicles averaged $529 and $385, respectively, and thefts of motor vehicle accessories resulted in average losses of $214 per offense. The average value loss for bicycle theft was $146 per incident.

Larceny Analysis by Region, 1982

[Percent distribution]

	Total[1]	North-eastern States	North Central States	Southern States	Western States

[1]Because of rounding, percentages may not add to totals.

Thefts of motor vehicle parts, accessories, and contents accounted for 39 percent of the larceny-theft volume in 1982. Other major types of thefts which contributed to the large number of these crimes were those from buildings, 16 percent; shoplifting, 12 percent; and bicycles, 9 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and miscellaneous types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

Clearances

Nationwide in 1982, 19 percent of all reported larceny-thefts were cleared. The Nation's city and suburban law enforcement agencies each cleared 19 percent of the larceny-thefts brought to their attention, while those in rural counties cleared 17 percent. One of every 4 of the city and suburban clearances involved persons under 18 years of age exclusively. In the rural counties, 17 percent of the clearances were accounted for by persons of this young age group.

Persons Arrested

The number of persons arrested for larceny-theft was up 20 percent during the period 1978-1982. Adult arrests jumped 41 percent for this 5-year period, while those of persons under 18 years of age dropped 8 percent. Between 1981 and 1982, total larceny-theft arrests rose 3 percent, as did arrests of both males and females. Adult arrests increased 7 percent, while arrests of persons under 18 declined 1 percent.

The larceny-theft category not only comprised the largest portion of the total Crime Index offenses reported, it also accounted for 53 percent of the total arrests for Index crimes in 1982. Forty-nine percent of these arrests were of persons under 21 years of age, and 32 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1982, comprised 29 percent of all larceny-theft arrestees.

Whites accounted for 65 percent of the total larceny-theft arrests and blacks for 31 percent. All other races made up the remainder. Eighty-nine percent of the arrestees were persons of some non-Hispanic ethnicity.

MOTOR VEHICLE THEFT

DEFINITION

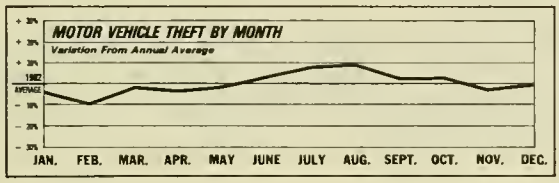
In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1981	*1,073,988*	*468.7*
1982	*1,048,310*	*452.8*
Percent change	– 2.4	– 3.4

Volume

In 1982, an estimated total of 1,048,310 thefts of motor vehicles occurred in the United States. These offenses comprised 8 percent of all Index crimes. Geographically, the volume of motor vehicle thefts in 1982 was highest in the Northeastern States, which reported 30 percent of the total. The Southern States accounted for 27 percent, and the North Central and Western States each reported 22 percent. Monthly volume figures show that the greatest number of motor vehicle thefts was recorded in August.



Trend

When comparing 1982 to 1981, the number of motor vehicle thefts decreased 2 percent nationwide. In the Nation's cities, this offense dropped 3 percent; in the suburban counties, it was down 4 percent; and in the rural counties, it fell 8 percent in volume from 1981.

A decline was seen in the volume of motor vehicle thefts in each geographic region. The Northeastern and North Central States both reported 4-percent decreases; the Western States, a 2-percent drop; and the Southern States, a decrease of less than 1 percent.

The accompanying chart shows that the number of motor vehicle thefts has increased 6 percent since 1978.

Motor Vehicle Theft by Month, 1978-1982

[Percent of annual total]

Months	1978	1979	1980	1981	1982
January	7.3	7.7	8.0	8.2	7.9
February	6.9	7.2	7.4	7.7	7.5
March	8.0	8.2	8.2	8.2	8.2
April	7.8	8.0	8.0	7.9	8.0
May	8.2	8.1	8.4	8.2	8.2
June	8.2	8.2	8.5	8.3	8.6
July	8.9	8.9	9.2	8.8	8.9
August	9.3	9.1	9.5	9.1	9.1
September	8.8	8.7	8.6	8.4	8.5
October	9.3	9.2	8.5	9.0	8.6
November	8.5	8.5	7.8	8.2	8.1
December	8.8	8.4	7.9	8.0	8.3

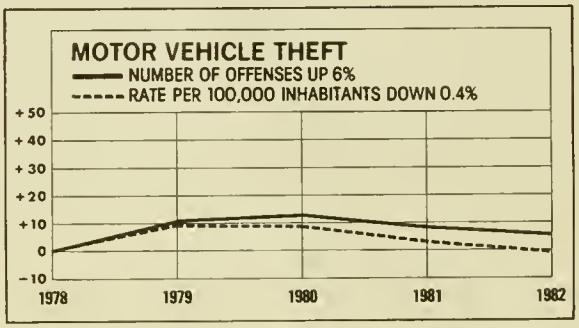
Rate

The motor vehicle theft rate in 1982 was 453 per 100,000 inhabitants nationwide, a 3-percent decline from the 1981 rate. Compared to the 1978 experience, the rate decreased less than 1 percent.

In the SMSAs, the motor vehicle theft rate was 554 per 100,000 inhabitants. Cities outside metropolitan areas (other cities) had a motor vehicle theft rate of 210, and the rural counties recorded the lowest rate, 110. The most heavily populated municipalities of the Nation continue to account for the high motor vehicle theft rates, clearly indicating that this offense is primarily a large-city problem.

Regionally, the Northeastern States reported the highest motor vehicle theft rate, 627 per 100,000 inhabitants. The remaining regions' rates per 100,000 population were 516 in the Western States; 385 in the North Central States; and 358 in the Southern States. All regions except the South experienced rate declines of 4 percent, 1982 versus 1981. The rate for the Southern States dropped 2 percent.

In 1982, an estimated average of 1 of every 153 registered motor vehicles was stolen nationally. Geographically, this rate was greatest in the Northeastern Region where 11 of every 1,000 motor vehicles registered were stolen. The other three regions reported lesser rates– 7 per 1,000 in the Western States and 5 per 1,000 in both the North Central and Southern States.



Nature

During 1982, the estimated total national loss due to motor vehicle theft was $3.7 billion. The average value of vehicles stolen was $3,545 at the time of theft.

Of all motor vehicles reported stolen during the year, 75 percent were automobiles, 14 percent were trucks or buses, and the remainder were other vehicles.

Motor Vehicle Theft, 1982

[Percent distribution]

Region	Total[1]	Autos	Trucks and buses	Other vehicles
Northeastern States	100.0	88.9	5.9	5.3
North Central States	100.0	78.3	11.8	9.8
Southern States	100.0	63.6	22.2	14.2
Western States	100.0	66.8	18.9	14.3
Total	100.0	74.8	14.5	10.7

[1]Because of rounding, percentages may not add to totals.

Clearances

Law enforcement agencies nationwide cleared 14 percent of the motor vehicle thefts reported in their locales during 1982. Those in cities cleared 13 percent; those in the suburban areas cleared 17 percent; and rural agencies cleared 33 percent. Clearance percentages for motor vehicle theft ranged from 8 percent in the Northeastern States to 21 percent in the Southern States. In the Western States, the clearance rate was 16 percent, and in the North Central States, 14 percent.

A high proportion of the clearances in all geographic divisions and population groups involved only persons under 18 years of age. In the suburban areas, persons in this age group accounted for 20 percent of the motor vehicle thefts cleared. In the Nation's cities and rural counties, they comprised 19 and 18 percent, respectively.

Persons Arrested

As in prior years, motor vehicle theft arrests primarily involved the younger segment of the Nation's population. During 1982, 57 percent of all persons arrested for motor vehicle theft were under 21 years of age, and those under 18 accounted for 36 percent of the total.

When the total volume of arrests for this offense during 1982 was compared with that of the previous year, a decrease of 8 percent was observed. Arrests of persons under 18 were down 16 percent, and adult arrests decreased 2 percent from 1981. For all ages collectively, a 20-percent drop in motor vehicle theft arrests was evident during the period 1978-1982.

In 1982, 67 percent of motor vehicle theft arrestees were white, 31 percent were black, and the remainder were of other races. Sixteen percent of all persons arrested for this offense were Hispanic.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Background

The UCR Program's collection of data on arson as a Part I Crime Index offense started in 1979 following a congressional mandate. Recognizing that arson has characteristics not common with other Index crimes, the data collection procedures were developed on the basis of input from the fire service and law enforcement communities, as well as the insurance industry. Specific guidelines and requirements were established for reporting arson offenses.

Unlike other Crime Index offenses, the occurrence of arson is not always immediately established by officials at the scene. Since the entire concept of the Crime Index is based on actual offenses known to law enforcement, it was decided that only fires determined through investigation to have been willfully or maliciously set, including attempts, were to be reported as arsons. Suspicious fires or those of unknown origin were to be excluded until definitely determined to be arsons.

The UCR policy on scoring multiple-offense situations, i.e., two or more Index crimes occurring at the same time and place, was modified for arson reporting only. Before the addition of arson to the Index, contributing law enforcement agencies were instructed that in such situations only one crime, based on an established hierarchy of offenses, was to be reported. It was, however, recognized that arson frequently occurs in conjunction with other Index crimes and that valuable information could be lost if the past procedure was employed. Therefore, it was determined that arson should be exempt from the hierarchy rule and that all arsons should be reported regardless of their commission in conjunction with another Crime Index offense.

Volume

Although the population coverage remains insufficient to estimate the total United States arson experience, 11,313 law enforcement agencies representing approximately 87 percent of the Nation's inhabitants were able to furnish at least six monthly arson reports during 1982. On these submissions, 106,501 arson offenses were reported for the year. Most of the agencies (11,157) were able to provide six or more reports with complete, detailed information, including type of structure and estimated monetary value of property damaged.

Trend

Based on reports from law enforcement agencies providing 6 or more months of arson data for 1981 and 1982, arson trends are shown in Tables 9-12 of this publication. Nationally, a 12-percent decrease in reported arsons occurred during the 2-year period. With respect to city size, the trend ranged from an 8-percent decrease in cities with 250,000 to 499,999 inhabitants to a 22-percent decline in cities with fewer than 10,000 inhabitants. The Nation's suburban counties recorded a 9-percent drop, and the rural counties registered a 13-percent decline.

By property type, those arsons in which structures were the targets decreased 5 percent nationwide. Arsons of mobile property were down 4 percent, and those of all other property declined 26 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as the collection continues.

Rate

Arson rates per 100,000 inhabitants are shown in an accompanying table. Since the population coverage for arson data is lower than for the other Crime Index offenses, these data were tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the rates ranged from 104.9 per 100,000 inhabitants in cities with populations over 1,000,000 to 30.2 per 100,000 rural county inhabitants. The overall 1982 national arson rate was 57.3 per 100,000 population.

Arson Rate, Population Group, 1982

[Rate per 100,000 inhabitants]

Group	Rate
TOTAL	57.3
TOTAL CITIES	63.5
Group I (cities 250,000 and over)	94.7
(cities 1,000,000 and over)	104.9
(cities 500,000 to 999,999)	79.3
(cities 250,000 to 499,999)	93.9
Group II (cities 100,000 to 249,999)	70.9
Group III (cities 50,000 to 99,999)	56.9
Group IV (cities 25,000 to 49,999)	45.8
Group V (cities 10,000 to 24,999)	32.0
Group VI (cities under 10,000)	34.0
Suburban Counties	47.1
Rural Counties	30.2
Suburban Area	42.1

Nature

Structures comprised 57 percent of the property targeted by arsons in 1982. Mobile property (motor vehicles, trailers, airplanes, boats, etc.) accounted for 24 percent of the arsons, while the remainder were directed at other property (crops, timber, fences, signs, etc.).

Sixty percent of the structural arsons in 1982 involved residential property, with 43 percent of such offenses directed at single-occupancy residences. Sixteen percent of all targeted structural property was uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 91 percent of all mobile property at which arsons were directed.

Averaging $9,731 per incident, the monetary value of property damaged due to reported arsons in 1982 was $843 million. Industrial/manufacturing structures registered the highest average loss, $54,599 per offense.

Clearances

The 1982 national arson clearance rate was 16 percent. City law enforcement agencies cleared 15 percent of the arson offenses brought to their attention; those in suburban counties cleared 19 percent; and those in the rural counties cleared 21 percent. Agencies in cities with fewer than 10,000 inhabitants registered the highest arson clearance rate, 25 percent.

Thirty-six percent of all 1982 arson clearances involved solely young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons under 18 accounted for 34 percent of the structural arson clearances, 23 percent of those for mobile property, and 56 percent for arsons of all other property.

The accompanying tables show clearance data only for those 11,157 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (37 percent) was recorded for offenses in which community or public structures were involved, while the lowest (10 percent) was registered for motor vehicles.

[1]Includes offenses cleared by exceptional means.
[2]The number of agencies used in this table is lower than the number used in Tables 19-22. To be included in this table, it was necessary that arson clearances be reported by property classification.

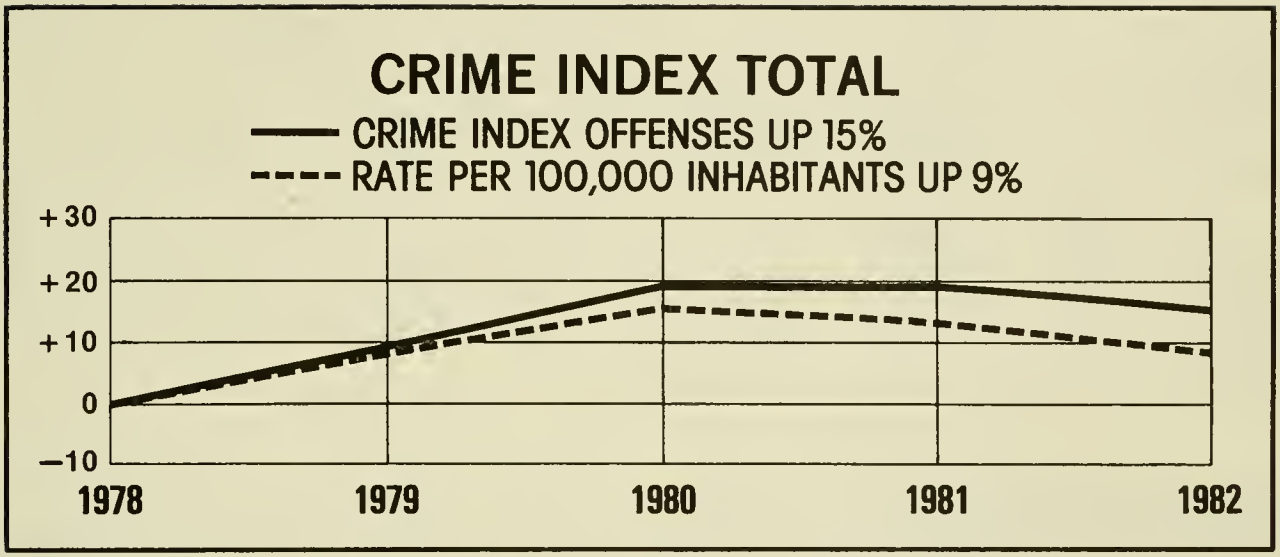
Persons Arrested

During 1982, the estimated number of arrests for arson totaled 20,500. Arrests of persons of all ages decreased 3 percent from the 1981 total but was 9 percent higher than the 1978 experience. Thirty-seven percent of the arrestees were under 18 years of age and 62 percent were under 25. Males comprised 87 percent of all arson arrestees.

By race, 74 percent of the persons arrested for this offense were white, 25 percent were black, and the remainder were of other races. Hispanics comprised 8 percent of the arrestees.



Crime Index Total

The estimated 12.9 million Crime Index offenses occurring in 1982 represented a 3-percent decline from 1981, the first significant annual decrease since 1977. Considering longer time frames, the 1982 total was up 15 percent over the 1978 figure and 47 percent higher than that for 1973.

Like the Index total, both the violent and property crime categories showed overall 3-percent decreases in 1982 as compared to 1981. The 1982 violent crime level was 21 percent higher than in 1978 and 47 percent above the 1973 experience. Property crime showed a 15-percent increase over 1978 and a 48-percent rise over 1973.

Two-year comparisons (1982 versus 1981) for the individual violent crimes showed murder down 7 percent, robbery down 6 percent, and forcible rape down 5 percent. Aggravated assault, the only Index crime to increase in volume, was up 1 percent.

In the property crime category, burglary decreased 9 percent, motor vehicle theft dropped 2 percent, and larceny-theft declined 1 percent.

The estimated figures for all Crime Index offenses covering these time periods are set forth in the table, "National Crime, Rate, and Percent Change."

Provided in the table, "Regional Offense and Population Distribution, 1982," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, while the Southern States accounted for the largest volume of Crime Index offenses in 1982, they also represented the greatest regional population.

National Crime, Rate, and Percent Change

Offense	Estimated crime 1982		Percent change over 1981		Percent change over 1978		Percent change over 1973

Southern States	33.7	32.8		45.0	37.0	27.7	38.8	34.4	32.7	26.7	
Western States	19.4	24.1		19.3	26.6	22.4	22.9	24.3	24.5	22.1	

[1]Because of rounding, percentages may not add to totals.

Based on the Index offenses, crime rates relate the incidence of reported crime to population; however, many factors influence the nature and extent of crime in a particular community. A crime rate takes into consideration only the factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given area. Some crime factors are enumerated on page v of this publication.

The table, "Crime Rate, Region, 1982," lists the crime rates per 100,000 inhabitants for the four geographic regions of the United States. Presented in the table, "Crime Rate, Area, 1982," are data for SMSAs, rural counties, and cities and towns outside metropolitan areas (other cities).

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1982 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 5 through 8. Two-year arson trends are shown in Tables 9 through 12.

Crime Rate, Region, 1982

[Rate per 100,000 inhabitants]

Offense	North-eastern States	North Central States	Southern States	Western States
Crime Index total	5,295.8	4,960.5	5,401.4	6,874.6
Modified Crime Index total				
Violent	638.8	401.2	562.4	653.0
Property	4,657.0	4,559.4	4,839.0	6,221.6
Murder	7.4	6.5	12.1	9.0
Forcible rape	25.4	26.7	36.8	46.0

Crime Index Tabulations

Data on crime in the United States as a whole; geographic divisions; individual states; Standard Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses are presented in this Section's tabular portions. Although the total number of actual criminal offenses occurring is unknown, the volume of crimes reported to law enforcement agencies represents an indicator of criminal activity.

In reviewing the tables in this report, it must be remembered that many factors can cause the volume and type of crime to vary from place to place. Population, one of these factors, is used in computing crime rates; however, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variability.

In addition to the presentations outlined above, national averages for the value of property stolen in connection with each offense are presented. Further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications are listed. Data on the type and value of property stolen and recovered are also provided.

National averages can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

Table 1. — Index of Crime, United States, 1982

[1]Populations are Bureau of the Census provisional estimates as of July 1, 1982, and are subject to change.
[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Table 2. — Index of Crime, United States, 1973-1982

[1] Populations are Bureau of the Census provisional estimates as of July 1, 1981 and 1982, and all are subject to change.
[2] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4] Offense totals based on all reporting agencies and estimates for unreported areas.
[5] Includes offenses reported by the U.S. Park Police for the District of Columbia and the Zoological Police.
[6] Population and offense data are not included in totals.

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes offenses reported by the U.S. Park Police for the District of Columbia and the Zoological Police.

Table 5. — Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1982

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Student enrollment data had not been received at the time this publication was prepared.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Data for more universities or colleges may be available from the Iowa Department of Public Safety at the address shown in Appendix VI.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characterstics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 7. — Number of Offenses Known to the Police, Suburban Counties, 1982

*Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37 and 38, since it is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

[1]Suburban places are within Standard Metropolitan Statistical Areas (SMSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Core cities are excluded. Nonsuburban places are outside SMSAs.

[2]The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[1]The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37 and 38, since it is not necessary to report arsons by property classification breakdowns to be included in this table.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

Table 13. — Crime Rates, Offenses Known to the Police, Population Group, 1982

[1982 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified[1] Crime Index total	Violent crime[2]	Property crime[3]	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for other seven Crime Index offenses. Independently tabulated arson rates appear on page 36 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups. Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 14. — Crime Rates, Offenses Known to the Police, Suburban and Nonsuburban Cities[1], Population Group, 1982

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 36 of this publication.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

SECTION III
CRIME INDEX OFFENSES CLEARED

Clearances of offenses, whether by arrest or by exceptional means, are of major importance to law enforcement agencies. An offense is cleared by arrest when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. It should be noted that several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one crime. Crime clearances are also recorded in exceptional instances when some element beyond police control precludes the placing of formal charges against the offender. Examples of circumstances allowing exceptional clearances are the death of the offender (suicide, deathbed confession, or the killing of the offender justifiably); the victim's refusal to prosecute after the offender has been identified; or extradition is denied because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies nationwide reported that 20 percent of the total Crime Index offenses were cleared during 1982. The overall violent crime clearance rate was 45 percent. For murder offenses, the rate was 74 percent; forcible rape, 51 percent; robbery, 25 percent; and aggravated assault, 60 percent. Of all property crimes reported, law enforcement agencies cleared 17 percent. Among the individual categories, police cleared 15 percent of the burglaries, 19 percent of the larceny-thefts, and 14 percent of the motor vehicle thefts. Clearances for crimes against persons are generally higher as more intense investigative efforts are often afforded these offenses, and witnesses are more frequently available to identify the perpetrators.

For arson, the eighth Index crime, the clearance rate was 16 percent. When arson was considered in the Modified Crime Index total, the overall clearance rate remained the same, 20 percent.

Regionally, the highest overall Crime Index clearance rate was recorded by the Southern States with 22 percent. Following were the Western States with 20 percent, and the Northeastern and the North Central States with 18 percent.

Considering population groupings, the clearance rates ranged from 15 percent in cities with populations of 1 million or more to 22 percent in cities with under 50,000 inhabitants. Rural counties showed clearances for 22 percent of the Index crimes reported, while suburban counties recorded a 20-percent rate.

Clearances Involving Only Persons under 18 Years of Age

One means of measuring the involvement of juveniles in crime is to identify the number of crimes in which they are offenders. Although no physical arrest may be made, a clearance by arrest can be recorded when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities. During 1982, 21 percent of the Crime Index offenses cleared involved only persons under the age of 18. Persons in this same age group accounted for 10 percent of the violent crime clearances and 24 percent of those for property crimes.

The percentage of juvenile involvement was much higher for arson than for any other Index crime. Thirty-five percent of all arson clearances involved persons under 18 years of age exclusively. Persons in this age category accounted for 28 percent of the 1981 U. S. population.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 38, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 38, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

SECTION IV
PERSONS ARRESTED

Arrests are primarily an indication of law enforcement activity as it relates to crime. Although arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time, arrests do provide a useful indication of involvement in criminal acts by the age, sex, race, and ethnic origin of the perpetrators. The volume of arrests for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies. However, arrests for robbery, burglary, and other serious crimes are more likely to be the result of uniform and consistent practices throughout all jurisdictions. Procedures used in this Program require that an arrest be counted on each separate occasion when a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

During 1982, law enforcement agencies made an estimated 12.1 million arrests nationwide for all criminal infractions except traffic violations. The arrest rate was 5,366 per 100,000 inhabitants of the total estimated United States population. Cities with over 250,000 in population showed an arrest rate of 7,856 per 100,000; suburban areas registered 4,341; and in rural counties, the rate was 3,501 per 100,000 people.

Arrest Trends

In 1982, arrests for all offenses excluding traffic violations rose 2 percent from 1981. During this time, arrests of persons under 18 years of age decreased 6 percent and arrests of persons 18 years of age and older were up 4 percent. When considering only the eight Crime Index offenses, arrests of persons of all ages increased less than 1 percent from the previous year. Adult arrests rose 4 percent and juvenile arrests decreased 7 percent.

During the 5-year period, 1978-1982, total arrests climbed 13 percent, with the arrests of persons under 18 years of age decreasing 15 percent but those of persons 18 and over increasing 22 percent. Total Crime Index arrests were up 13 percent; those of adults rose 32 percent; and those of juveniles dropped 15 percent. Violent crime arrests for persons under 18 years of age decreased 4 percent, while the property crime arrests for this age group fell 16 percent. Data on persons 18 years of age and over showed increases of 23 percent for violent crime arrests and 36 percent for property crime arrests.

Arrests for drug abuse violations in 1982 rose 1 percent over the 1981 total. In the period 1978 to 1982, arrests for these violations increased less than 1 percent. The types of drugs involved in violations resulting in arrests during 1982 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations

[Percent distribution]

	Total[1]	Heroin or cocaine	Marijuana	Synthetic narcotics	Other
Northeastern States	100.0	27.3	62.1	4.0	6.6
Sale/manufacture	27.3	11.7	11.7	1.4	2.4
Possession	72.7	15.6	50.4	2.6	4.2
North Central States	100.0	5.7	73.9	6.7	13.7
Sale/manufacture	18.3	1.7	8.8	1.5	6.3
Possession	81.7	4.0	65.1	5.3	7.4
Southern States	100.0	9.5	71.7	4.4	14.4

Possession	79.6	11.9	56.8	2.6	8.4

[1]Because of rounding, percentages may not add to total.

Age

Nationally, age distribution data for all arrestees revealed that 5 percent were under the age of 15, 18 percent were under 18, 34 percent were under 21, and 53 percent were under 25.

Proportionally, arrests of young persons were greater in the Nation's cities and suburban areas than in the country as a whole. The under 25 age group accounted for 55 percent of both the city and suburban area arrests. In the rural counties, the distributions of arrests for the younger age groups were lower than the national experience. Persons under age 25 comprised 44 percent of the total rural arrests.

Considering only the Crime Index offenses (including arson), 12 percent of the arrestees in the Nation were under the age of 15; 31 percent were under the age of 18; 48 percent were under 21; and 64 percent, under 25. A further examination of figures on arrestees in the lower age brackets showed that persons under 25 years of age comprised 53 percent of those arrested for violent crimes and 67 percent of those arrested for property crimes.

Sex

A comparison with 1981 figures showed that in 1982 both male and female arrests increased, 2 percent and 4 percent, respectively. Outnumbering women arrestees by 5 to 1, males accounted for 84 percent of all arrests, 80 percent of those for Index crimes, 90 percent of those for violent crimes, and 78 percent of those for property crimes.

As shown in former years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 80 percent of arrests of women for Index crimes and 21 percent of all female arrests.

Arrests of both males and females under 18 years of age decreased 15 percent since 1978. When restricted to only the Crime Index, arrests of females under age 18 fell 16 percent and those of males in the same age group dropped 14 percent during the 5-year period.

Arrest Rates

Arrest rates are a measure of law enforcement activity in response to crime. The accompanying table presents the Crime Index arrest rates per 100,000 inhabitants in the four geographic regions of the United States.

Arrests, Region, 1982

[Rate per 100,000 inhabitants]

Offense	United States total	North-eastern States	North Central States	Southern States	Western States
Murder	9.9	7.1	10.0	11.1	10.8
Forcible rape	15.1	13.5	15.2	15.6	16.0
Robbery	73.7	102.0	63.1	55.3	83.9
Aggravated assault	138.2	129.6	82.5	158.7	161.3

[1]Includes all offenses except traffic and neglect cases.
[2]Because of rounding, the percentages may not add to total.
[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are included in other groups.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

SECTION V
LAW ENFORCEMENT PERSONNEL

Law Enforcement Employees

As of October 31, 1982, there was an average of 2 full-time law enforcement officers for every 1,000 inhabitants in the United States. Representing a population of 220 million, 11,776 city, county, and state police agencies reported employing a total of 448,927 officers. Including full-time civilians, the total law enforcement employee force was 581,262 for a rate of 2.6 per 1,000 inhabitants.

Because of varying demographic and other jurisdictional characteristics, the requirements for law enforcement service differ greatly from one locale to another. For example, the needs of a community having a highly mobile or seasonal population may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

City law enforcement employee averages in 1982 ranged from 2 per 1,000 inhabitants in those with populations from 25,000 to 49,999 to 3.3 for those with populations of 250,000 or more. The suburban areas averaged 2.3 full-time law enforcement employees per 1,000 inhabitants, while the average rate for sheriffs' or county police departments, like the national average, was 2.0.

Geographically, the highest law enforcement employee rate per 1,000 inhabitants was evident in the South Atlantic Division, with 3.1. The fewest number of employees per 1,000 population was reported by the West South Central Division, with an average rate of 2.1.

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2 officers per 1,000 inhabitants. By population grouping, the lowest average rate (1.5) was for sheriffs' or county police departments, while cities 250,000 or more in population recorded the highest rate, 2.7. Suburban law enforcement agencies averaged 1.8 officers per 1,000 population.

Nationwide, 94 percent of all sworn employees were males. In city agencies, males comprised 95 percent; in the suburban areas, 94 percent; and in the rural counties, 90 percent.

Civilian Employees

Civilians represented 19 percent of all city law enforcement personnel in 1982. In suburban areas, they accounted for 23 percent; and in the rural counties, they comprised 27 percent. Nationally, they represented 22 percent of the total law enforcement strength.

Law Enforcement Officers Killed and Assaulted

During 1982, 92 law enforcement officers were feloniously killed in the line of duty. Ninety-one officers were slain in 1981, the year with the lowest total of the past decade.

According to nearly 9,000 law enforcement agencies nationwide, assaults on officers numbered 55,775 in 1982. During the year, assaults averaged 17.5 per 100 officers, while 5.4 of every 100 officers suffered personal injuries as a result of the assaults.

Extensive data on line-of-duty killings and assaults can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

[1]Law enforcement employee data were not furnished to the National Uniform Crime Reporting Program by the Montana Board of Crime Control.

SECTION VI
APPENDIX I
TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 67, *Crime in the United States-1982.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of participation:

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least one month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publication employ statistics from one or more of the above-listed participation levels. For example, Table 1 includes all three agency reporting levels, but Table 13 presents only data for agencies having reported the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1982).	Statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1982, Bureau of the Census provisional estimates. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1982.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1982 statistics are consistent with Table 1, *Crime in the U. S.* Pre-1982 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 estimations for each year except April 1, 1980. The offense breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the 10th place for violent crime and 100th place for property crime.	Represents an estimation of national reported crime activity from 1973 to 1982.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1982 statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1981 and 1982. Population statistics represent July 1 provisional estimates for 1981 and 1982. The offense breakdowns are according to UCR crime definitions (App. II).	Represents an estimation of reported crime activity for Index Offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1982).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1982, Bureau of the Census provisional estimates. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies submitting complete reports for 12 months in 1982.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The populations are July 1, 1982, estimates for each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
6	All university/college law enforcement agencies submitting complete reports for 12 months in 1982.		Represents reported crime for individual university/college law enforcement agencies listed alphabetically by state. Totals are supplied for violent and property crimes. Any comparison of UCR statistics should take into consideration demographic differences.
7	All law enforcement agencies submitting complete reports for 12 months in 1982.	"Suburban Counties" are defined as the areas covered by noncity agencies within an SMSA (App. III).	Represents crime reported to individual law enforcement agencies in suburban counties. Any comparison of UCR statistics should take into consideration demographic differences.
8	All law enforcement agencies submitting complete reports for 12 months in 1982.	"Rural Counties" are those outside SMSAs and not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1982, estimates for individual agencies.	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over. Any comparison of UCR statistics should take into consideration demographic differences.
9-12	All law enforcement agencies submitting complete reports for at least 6 common months in 1981 and 1982.	The 1982 crime trend statistics are 2-year comparisons based on 1982 reported crime activity. Only common reported months for individual agencies are included in 1982 trend calculations. Populations represent July 1, 1982, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than core cities in SMSAs.	Slight decrease in national coverage for Table 12 due to editing procedure and lower submission rate.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
13-16	All law enforcement agencies submitting complete reports for 12 months in 1982.	The 1982 crime rates are the ratios of the aggregated 1982 crime volumes and the aggregated 1982 populations of the contributing agencies. Population statistics represent July 1, 1982, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than core cities in SMSAs.	Slight decrease in national coverage for Table 16 due to editing procedure and lower submission rate.
17, 18	All law enforcement agencies submitting complete reports for at least 6 months in 1982.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1981 and 1982.	Aggravated assault is excluded from Table 17. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
19-22	All law enforcement agencies submitting complete reports for at least 6 months in 1982.	The 1982 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1982. Population statistics represent July 1 estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
23	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1982).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 24) divided by the percent of total group population reporting (according to July 1, 1982, estimates).	
24	All law enforcement agencies submitting complete reports for 12 months in 1982.	The 1982 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1982 reported arrest statistics and population. The population statistics represent the July 1, 1982, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
25, 26	All law enforcement agencies submitting annual reports in 1973 and all months in 1982.	The arrest trends are the percentage differences between 1973 and 1982 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1982, estimates.	
27, 28	All law enforcement agencies submitting complete reports for 12 months in 1978 and 1982.	The arrest trends are the percentage differences between 1978 and 1982 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1982, estimates.	
29, 30	All law enforcement agencies submitting complete reports for 12 months in 1981 and 1982.	The arrest trends are 2-year comparisons between 1981 and 1982 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1982, estimates.	
31-37	All law enforcement agencies submitting complete reports for 12 months in 1982.		Slight decrease in coverage for Tables 36 and 37 due to editing procedure and lower submission of race and ethnic origin data.
38, 42	All city law enforcement agencies submitting complete reports for 12 months in 1981 and 1982.	The 1982 city arrest trends represent the percentage differences between 1981 and 1982 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
39-41, 43, 44	All city law enforcement agencies submitting complete reports for 12 months in 1982.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Tables 43 and 44 due to editing procedure and lower submission of race and ethnic origin data.
45, 49	All suburban county law enforcement agencies submitting complete reports for 12 months in 1981 and 1982.	1982 suburban county trends represent percentage differences between 1981 and 1982 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an SMSA (App. III).	
46-48, 50, 51	All suburban county law enforcement agencies submitting complete reports for 12 months in 1982.	"Suburban Counties" are defined as the areas covered by noncity agencies within an SMSA (App. III).	Slight decrease in coverage for Tables 50 and 51 due to editing procedure and lower submission rate.
52, 56	All rural county law enforcement agencies submitting complete reports for 12 months in 1981 and 1982.	1982 rural county trends represent percentage differences between 1981 and 1982 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside SMSAs (App. III).	

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
53-55, 57, 58	All rural county law enforcement agencies submitting complete reports for 12 months in 1982.	"Rural Counties" are defined as noncity agencies outside SMSAs (App. III).	Slight decrease in coverage for Tables 57 and 58 due to editing procedure and lower submission of race and ethnic origin data.
59, 63	All suburban area law enforcement agencies submitting complete reports for 12 common months in 1981 and 1982.	1982 suburban area arrest trends represent percentage differences between 1981 and 1982 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as all counties and cities with fewer than 50,000 inhabitants within SMSAs (App. III).	
60-62, 64, 65	All suburban area law enforcement agencies submitting complete reports for 12 months in 1982.	"Suburban Area" is defined as counties and cities with fewer than 50,000 inhabitants within SMSAs (App. III).	Slight decrease in coverage for Tables 64 and 65 due to editing procedure and lower submission of race and ethnic origin data.
66	All law enforcement agencies submitting complete reports for 12 months in 1982.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1 provisional estimates for 1982. The tabular breakdowns are according to UCR crime definitions (App. II).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
67	All law enforcement agencies submitting complete reports for 12 months in 1982.	Population statistics represent July 1, 1982, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II
OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the number of Part I offenses known to law enforcement, the number cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are as follows:

1. **Criminal Homicide.**– a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

2. **Forcible rape.**– The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used– victim under age of consent) are excluded.

3. **Robbery.**– The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or putting the victim in fear.

4. **Aggravated assault.**– An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

5. **Burglary-breaking or entering.**– The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

6. **Larceny-theft** (except motor vehicle theft).– The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

7. **Motor vehicle theft.**– The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

8. **Arson.**– Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

9. **Other assaults** (simple).– Assaults and attempted assaults where no weapon was used and which did not result in serious or aggravated injury to the victim.

10. **Forgery and counterfeiting.**– Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

11. **Fraud.**– Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks, except forgeries and counterfeiting.

12. **Embezzlement.**– Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. **Stolen property; buying, receiving, possessing.**– Buying, receiving, and possessing stolen property, including attempts.

14. **Vandalism.**– Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

15. **Weapons; carrying, possessing, etc.**– All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

16. **Prostitution and commercialized vice.**– Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

17. **Sex offenses (except forcible rape, prostitution, and commercialized vice).**– Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

18. **Drug abuse violations.**– State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

19. **Gambling.**– Promoting, permitting, or engaging in illegal gambling.

20. **Offenses against the family and children.**– Nonsupport, neglect, desertion, or abuse of family and children.

21. **Driving under the influence.**– Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. **Liquor laws.**– State or local liquor law violations, except "drunkenness" (offense 23) and "driving under the influence" (offense 21). Federal violations are excluded.

23. **Drunkenness.**– Drunkenness or intoxication. Excluded is "driving under the influence" (offense 21).

24. **Disorderly conduct.**– Breach of the peace.

25. **Vagrancy.**– Vagabondage, begging, loitering, etc.

26. **All other offenses.**– All violations of state or local laws, except offenses 1-25 and traffic offenses.

27. **Suspicion.**– No specific offense; suspect released without formal charges being placed.

28. **Curfew and loitering laws.**– Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

29. **Runaways.**– Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III
UNIFORM CRIME REPORTING AREA DEFINITIONS

Standard Metropolitan Statistical Area

A Standard Metropolitan Statistical Area (SMSA) is a statistical construct used to define metropolitan areas in a uniform manner. It is an integrated economic and social unit with a recognized large population nucleus. The SMSA concept was developed to facilitate the analysis and dissemination of statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data.

An SMSA includes a central city (cities) of specified population (generally over 50,000) and the county (counties) in which it is located. In addition, an SMSA also includes contiguous counties when the economic and social relationships between the central and contiguous counties meet specified criteria of metropolitan character and integration. An SMSA may cross state lines. In New England, SMSAs are composed of cities and towns instead of counties.

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are SMSA, other cities, and rural counties.

SMSAs made up approximately 75 percent of the total United States population in 1982. In addition to the core city (cities), an SMSA includes suburban cities and suburban counties. Together these two groups make up the suburban area. A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the SMSA.

"Other cities," most of which are incorporated, are those outside SMSAs. They comprised 10 percent of the 1982 population of the United States.

Rural counties, which are those outside SMSAs, comprised 15 percent of the 1982 national population. Their population figures exclude areas covered by city police agencies.

The following diagram illustrates the aforementioned discussion of the community types.[1]

	SMSA	NON-SMSA
CITIES	CORE CITIES OVER 50,000	OTHER CITIES
	SUBURBAN CITIES	
COUNTIES (unincorporated area)	SUBURBAN COUNTIES	RURAL COUNTIES

Population Groups

The population group classifications used by the UCR Program are as follows:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural County)	County	N/A
IX (Suburban County)	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. The following table shows the number of UCR contributing agencies within each population group for 1982.

Population Group	*Number of Agencies*
I	58
II	115
III	305
IV	637
V	1,646
VI	7,660
VIII (Rural County)	3,696
IX (Suburban County)	1,553
Total	15,670

Regions and Divisions

Geographically, the United States is comprised of four regions: the Northeastern States, the North Central States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

[1]In New England, "town" instead of "county" is used to describe SMSAs. These towns do not coincide generally with established reporting units; therefore, metropolitan state economic areas are used in tabulations for New England since they encompass an entire county or counties.

NORTHEASTERN STATES

New England
- Connecticut
- Maine
- Massachusetts
- New Hampshire
- Rhode Island
- Vermont

Middle Atlantic
- New Jersey
- New York
- Pennsylvania

NORTH CENTRAL STATES

East North Central
- Illinois
- Indiana
- Michigan
- Ohio
- Wisconsin

West North Central
- Iowa
- Kansas
- Minnesota
- Missouri
- Nebraska
- North Dakota
- South Dakota

SOUTHERN STATES

South Atlantic*
- Delaware
- Florida
- Georgia
- Maryland
- North Carolina
- South Carolina
- Virginia
- West Virginia

East South Central
- Alabama
- Kentucky
- Mississippi
- Tennessee

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

*Includes District of Columbia.

WESTERN STATES

Mountain
- Arizona
- Colorado
- Idaho
- Montana
- Nevada
- New Mexico
- Utah
- Wyoming

Pacific
- Alaska
- California
- Hawaii
- Oregon
- Washington

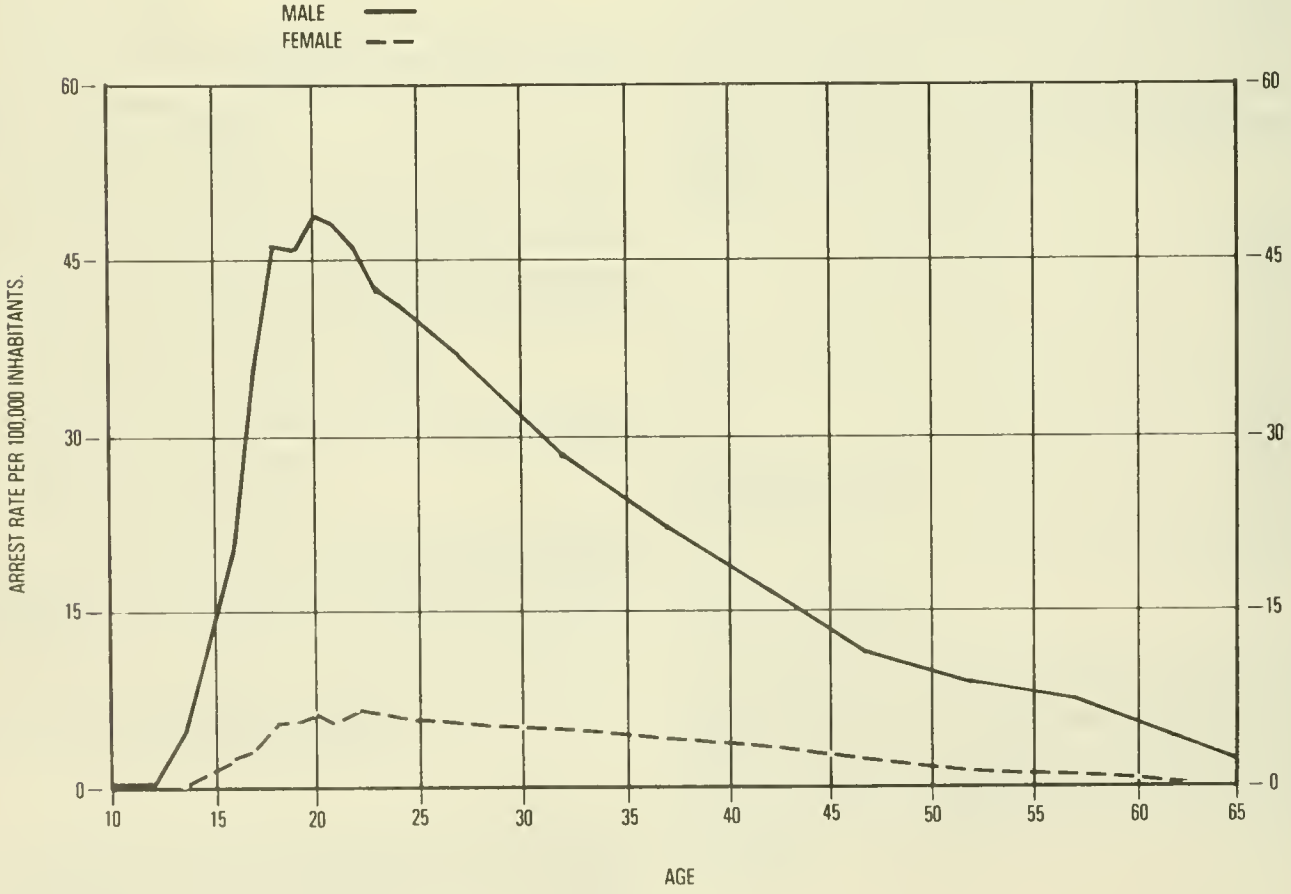
APPENDIX IV
AGE-SPECIFIC ARREST RATES BY SEX

This appendix presents age-specific arrest rates by sex for the Crime Index offenses of murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. An age-specific arrest rate refers to the number of arrests per 100,000 inhabitants belonging to a prescribed age group. Using UCR data based on reports from agencies supplying figures for complete 12-month periods, age-specific arrest rates for males and females were computed for the years 1973, 1978, and 1982. These time periods were selected in order to provide both 5- and 10-year comparisons.

A review of the appendix tables reveals that different offenses have different involvement patterns in terms of age and sex. It will be noted that, generally, property crime arrests peak at earlier ages than do violent crime arrests. The tables also show that the peak ages of arrest for certain offenses may shift over time.

The following graph illustrates the distribution of 1982 age-specific arrest rates for the offense of murder.

AGE-SPECIFIC MURDER ARREST RATES, 1982



Murder, Age-Specific Arrest Rates by Sex, United States

	1973			1978			1982
